

Friends of Autism Golf Outing 2022

What is Autism?
Autism is a severe, lifelong developmental disability that typically appears during the first three years of life. It is a neurological disorder that affects the brain thereby interfering with normal development in the areas of social interaction and communication. Children and adults with autism typically have difficulties in verbal and nonverbal communication, social interaction and leisure or play activities. This disorder makes it difficult for them to communicate with the outside world. Though many children make great strides through early intervention, even today, most people with autism will never marry, have a job or live independently. Half of all children will never learn to speak.
Every week there are six babies born in Wisconsin who will later be diagnosed with an Autism Spectrum Disorder. There are currently over 28,000 people in Wisconsin with Autism.

Co-Event Sponsors
usbank
PYRAMAX BANK
Cap Sponsor
AUTOCARE CENTER

Our mission is to raise public awareness of the unique needs and contributions of people with autism.
To achieve our goal, we will engage the public in projects to promote education on autism, secure funds and increase autism research efforts.
